**Note:**

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3b, State Total Served During Year is calculated using data from URS/DIG Tables 3a and 3b.

This table uses data from URS/DIG Tables 3a, 3b, and 6.

**State Notes:**

3a Gender None

Age None

Overall Homeless status is measured as one of the categories in living arrangement.

3b Gender None

Age None

Overall Residential treatment center is not a facility definition in California.

6 Hospital The lower number of discharges in comparison to admissions would indicate a net increase in the number of people in inpatient services at the end of the year. However, there has not been a substantial increase in the number of inpatient beds. This difference is likely due to missing discharge dates on some records.

Other Inpatient None

Residential Residential Treatment Center is not a facility definition in California.

Community None

Overall Community Programs have 6 people served at beginning of year and 447 people admitted with unknown age.

**State Notes:**

CA does not use a random sampling method for MHSIP data collection. FY 2001-2002, local MH agencies made attempts to get MHSIP surveys from all consumers annually &/or at discharge. Confidence interval aren't reported here, because the survey methods used are not compatible with the concept of the confidence interval. Also, CA only just began using the YSS & YSS-F on a Statewide basis in November 2003. Therefore, data will be submitted next year for the YSS/YSS-F.
